### FRP Dilution Tank

Description:

From the design & fabrication to tank & piping installation at site, we offer turn-key solutions to your wastewater dilution needs.

Our dilution tanks are suitable for laboratories where they are installed below lab benches and sinks for local dilution before channelling to the main drain.

Our FRP constructed dilution tanks can be custom designed to suit site requirements where space might be a concern.

All our dilution tanks come with internal baffle plates for longer retention time and removable top cover for easy maintenance.

***\* For enquiries on centralized dilution tank, please contact us for further details.***
